# STRATOS

Getting Started

Step 1: Get TestFlight

Look for an email from the iTunes Store to download the TestFlight app.

TestFlight only works on Apple Mail or Gmail.
TestFlight does not work with Outlook.
Check to make sure your iPhone is 5 or higher with iOS 8.1.1 and above.

Step 2: Download the Stratos App

Once the Stratos App has downloaded, you should see it on your mobile device screen. Open the App.
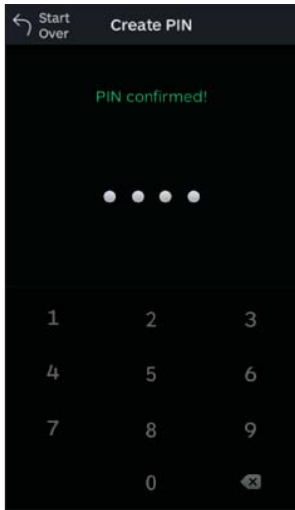

Step 3: Log Into Your App

Click on Sign in. Enter your Stratos email ID and login password.

You will need to setup your password. Click this link and submit the email address provided to Stratos. You will receive an email with a link you can use to securely set your password.
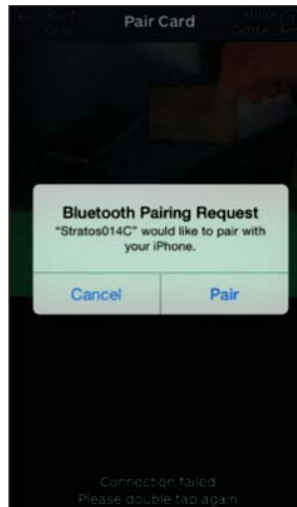

Step 4: Set Your PIN & Your Permissions

When you first log into the app, you will set a PIN. You will be asked to reenter the PIN.

Set Permissions in order to use the Stratos Reader, to receive mobile notifications and to turn on location services for best experience.

Step 5: Pair Stratos With Your Mobile Device

Double tap your Stratos and select pair from the Bluetooth Pairing request.

Step 6: Adding Your Cards

Select Add Card on the bottom menu of the Wallet View to add your cards.

You will be asked to select the type of card you are going to load.

STRATOS

Step 7: Swipe In A Card

Remove the clear plastic tab from the Stratos Reader and plug into your mobile device.

Swipe your card quickly through the reader.

Step 8: Enter Your Card Information

Put in the card CVC. Choose a name, pick a card color and card type. Select save to store your card on your Stratos Wallet.
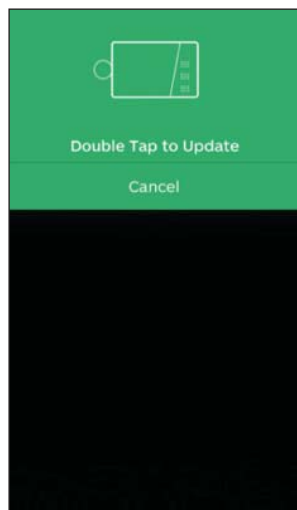

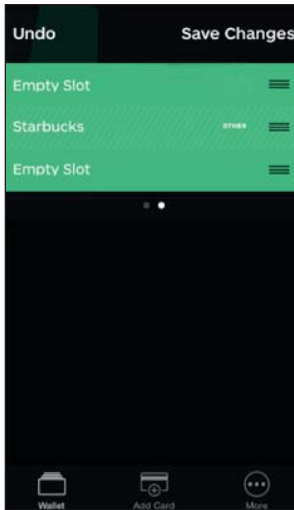

Repeat steps 6-8 to add more cards.

Step 9: Add Your Top 3 Favorites

Swipe left on the wallet view to access the Edit Favorites screen.

Step 10: Rearranging Your Top 3 Favorites

Hold down and then drag a card into a favorite spot.

Save changes and double tap your Stratos Card to sync.

Repeat steps 9-10 to add two more favorites.

Step 11: Set Card LockDown (Optional)

In your Stratos Mobile App, go to the More tab on the bottom menu and tap on " Stratos Card LockDown".

Select enable to turn on LockDown.

Set your LockDown time interval and Tap "Done" when you're ready.

BLAKE PETERSON
Member 5893

Single Tap
Single tap your card before swiping. A single tap wakes up your Stratos Card. A flashing amber LED indicates which card is ready to use. Your Stratos defaults to the last card used.
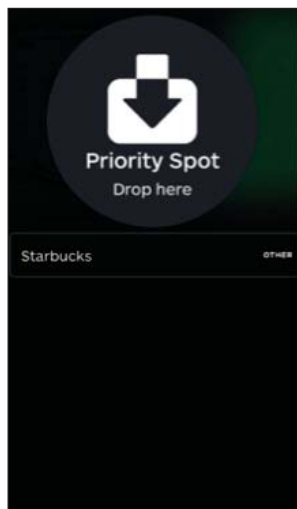

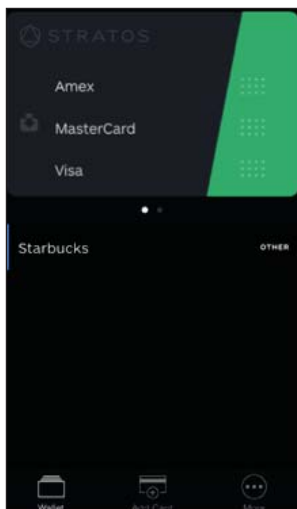

Double Tap
Tap twice on your Stratos Card to change your top 3, the LED's will flash in an amber waterfall pattern -- until you select one of the three touch sensors.

Tap twice to see what is in your top 3 favorites on your mobile lock screen.

Priority Spot
Drop here

Starbucks   OTHER

Add a card to the Priority Spot by dragging a card up from your card list view into the Priority Spot icon.

Double tap to sync this change to your Stratos Card. An amber LED should flash in the Priority Spot icon.

Note: This card is now selected for use until you clear it with a double tap.
